

Sfinx™

Laptop- & Monitor Stand

The idea of integrating a monitor stand with a foldable platform for docking station and laptop is an absolutely unique design which is both functional and it saves space on the desktop. Sfinx is a unique, patented innovation!

Time to create more space!

Sfinx Monitor stand has an integrated platform for a docking station to laptop computers, taking advantage of the same space as the normal monitor, while allowing vertical adjustment of your monitor to the desired level.

The laptop computer is quickly and easily docked to the docking station on the collapsible platform, which then is raised to the vertical position and the pivoting monitor stand is turn 180° for immediate use.

Never before has anything as practical and space-saving been available on the market for storing laptop computers – **Worldwide!**
